Aerospace Science and Manufacturing Sandpit

Virtual | June 9-10, 2021

NHADEC has been working hard to open doors at UNH -- to increase the level of communication and collaborate on new technical opportunities to benefit member companies.

This is your chance to be part of our new relationship with UNH.

About the Event

This event is designed to provide you with an opportunity to network and collaborate with UNH researchers who cover a wide range of expertise, including:

- **Space sciences**
- **Autonomous vehicles and drones**
- **Advanced materials**
- **Materials modeling and development**
- **Sensors and actuators**
- **Advanced manufacturing**
- **Fluid flow and aerodynamics**
- **Sustainability in aerospace science and manufacturing**
- **and more**

Learn about additional UNH resources and facilities, including:

- **Space Science Center (SSC)**
- **John Olson Advanced Manufacturing Center**
- **The Center for Coastal and Ocean Mapping/Joint Hydrographic Center (CCOM/JHC)**
- **Center for Acoustic Research and Education (CARE)**
- **University Instrumentation Center (UIC)**

This industry-focused event will create opportunities for new partnerships between NHADEC members, the university and others in the business community, ultimately to encourage economic development.

NHADEC Members! Join UNH for an interactive 2-day event to learn more about aerospace science and manufacturing research and resources at UNH. This will be especially valuable for the technical people in your company.

Attend on either day or on both days.

Day 1 – Learn and Network

June 9, 2021 | 9:00 AM - 11:30 AM

Join us on Day 1 for introductions to research and resources at UNH. After some short introductory presentations, participants will be able to move around the virtual room to network, learn more from the presenters, discuss pressing challenges with experts and colleagues, and talk about potential collaborations and partnerships.

Day 2 – Collaborative Sandpit

June 10, 2021 | 9:00 AM - 12:00 PM

Day 2 is the aerospace science and manufacturing collaborative sandpit session. You will hear from experts in the field about pressing challenges in aerospace science and manufacturing and then work in interdisciplinary teams to develop potential solutions to those challenges. Throughout the sandpit, trained facilitators will help teams to focus the discussion and guide groups through the ideation process to explore solutions.

This “virtual” sandpit session is unique and NHADEC members will be among the first to attend. The goal of this collaborative sandpit is to help attendees meet researchers and other professionals in this field, forge new partnerships, explore collaborations, and generate ideas for potential future projects.
